Professional Summary

Software Developer with 2 year of experience building scalable web applications using React.js, Laravel (PHP), and modern JavaScript (ES6+). Proven success in reducing page load time by 40% through performance optimization and lazy loading. Skilled in developing RESTful APIs, implementing authentication and validation in Laravel, and integrating them with dynamic React frontends. Focused on writing clean, maintainable code and delivering seamless user experiences across devices.

Work Experience

Software Developer *Implevision Technology, Mumbai*

Feb 2024 – Present

- Developed and optimized 5+ React.js and Laravel-based web applications, improving application scalability and long-term maintainability by 30% through modular architecture and clean coding practices.
- Built and integrated 20+ RESTful API endpoints in Laravel with authentication, validation, and database relations.
- Designed interactive dashboards using ECharts and ag-Grid to visualize 10,000+ records in real time.
- Created a component library of 20+ reusable UI elements using Chakra UI and React-Bootstrap.
- Enhanced app performance by 40% through code splitting, lazy loading, and network request optimization.
- Managed complex client-side state across 10+ modules using Redux and Context API, ensuring consistent UI behavior and reducing state-related bugs by 25%.
- Ensured WCAG 2.1 accessibility compliance and cross-browser compatibility across Chrome, Firefox, Edge, and Safari, supporting seamless usage on desktop and mobile devices.
- Collaborated in Agile sprints, contributing to planning, reviews, and cross-functional delivery.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, PHP, HTML, SQL

Libraries/UI: React.js, Laravel, Node.js, Chakra UI, Material-UI, React-Bootstrap

Database: MySQL

Tools: Git, GitHub Desktop, Jira, Postman, Datadog

Projects

Enterprise Policy Management System

- Engineered a scalable React.js app using Redux to manage 5 distinct policy workflows.
- Built reusable UI components and configurable forms for agents and underwriters.
- Integrated REST APIs with async/await and custom error handling, ensuring 99% data reliability.

Odyssey Health (Jobs Monitoring Dashboard)

- Created a system health dashboard leveraging Laravel enums and the job-tracking package for real-time job monitoring.
- Integrated ECharts to visualize failed, pending, and successful jobs in real time, reducing job failure investigation time by 40%.
- Connected Laravel REST APIs with ag-Grid tables to display detailed error logs and debugging information, improving issue resolution efficiency for support and engineering teams.

Business Analytics Dashboard

- Designed and developed interactive analytics dashboards for Policy, Claims and Users, featuring real-time KPIs, historical comparisons, trend analysis, and drill-down capabilities to support data-driven decision-making.
- Implemented advanced data visualization and filtering, including time-based trend charts, interactive USA map filtering, and data-driven summary cards for daily, weekly, monthly, and year-to-date metrics.
- Enhanced user experience with loading overlays, skeleton loaders, responsive layouts, and reusable UI components using React, Chakra UI, and custom UI libraries.

Education

Bachelor of Engineering (B.E.) – Electronics & Telecommunication, AISSMS IOIT, Pune

Aug 2019 – Jul 2023

◦ **CGPA:** 8.17 / 10.0

◦ **Coursework:** Computer Networks, Cloud Computing, IoT, Systems Design

Certifications & Extras

Certifications: Front-End Developer Certificate (Speed Up)

Additional Skills: AWS CodePipeline, AWS Lambda Functions
